

ALASKA POSTSECONDARY ACCESS AND COMPLETION NETWORK

BOARD OF DIRECTORS ELECTION

FEBRUARY 24 – MARCH 3, 2021

Kelechukwu Alu (*Postsecondary Education Seat Nominee*)

Kelechukwu (KC) Alu has been a professor of developmental math with the University of Alaska Fairbanks since 2014, working first at the Chukchi Campus in Kotzebue and currently at the Kuskokwim Campus in Bethel. During his time with UAF, Professor Alu has demonstrated his strong devotion to working with students and community members to improve math skills in bush Alaska. While teaching at the Chukchi Campus, Professor Alu traveled extensively to villages in the region to host “Math Nights” for the community. These events emphasized the importance of developing math skills for children and adults while also including games, prizes, and food to create a community celebration of the event. His extensive travels throughout the state have provided Professor Alu with insights about what changes need to be made to continue to develop mathematics instruction in bush Alaska. Professor Alu believes that this experience and dedication make him a strong candidate to serve on the Alaska Postsecondary Access and Completion Network Board of Directors and sincerely appreciates your support. Thank you.
